HARNESS RACING - IMPLEMENTATION OF ONTRACK STEWARDS PORTAL

Office of Racing Integrity (ORI) is committed to the delivery of improved race meeting procedures through emerging technologies, with Ontrack being introduced for Harness racing in Tasmania.

Ontrack is a dedicated Harness racetrack operations and integrity tool used by Stewards for check-ins, paperless swabbing and parade ring scanning and has been successfully used by Harness Racing Victoria for the past 18 months. The system will provide efficiencies in operations with streamlined access to real time information and automated checks and notifications.

The OnTrack portal will be implemented by ORI stewards from Friday, 15 November at the TTC meeting in Hobart.

To assist with the implementation of this system, please ensure that your contact details, including email address, are correct and up to date in HarnessWeb.

For easy check-in, if you can access HarnessWeb on your phone and you are a licensed person, you will be able to access digital identification which has a QR code for scanning purposes.

Thank you for your assistance for the smooth delivery of Ontrack to harness racing in Tasmania.
